LARGE DIVIDENDS.

LARGE DIVIDENDS tell of skilful and capable management on the part of the company. If the death losses are low, it signifies that extreme care has been exercised in the selection of applicants. If the expense of management is low, it shows that the company is economical and pradently managed. If the rate of interest realized on investments is high—and the securities are safe—it means that the Company invests the polluyholders' money to the greatest advantage. If you want a policy in a Company that does all of the above, take a policy in the UNION CENTINAL.
